

Web Applications (2025/26)

Instructions for exam submission through GitHub Classroom

1 Goal

The exam submission will be done by pushing your project to a specific repository that will be created by the “GitHub Classroom” application. **NOTE** that this approach is valid **ONLY for the first two exams** (June and July 2026) since the “GitHub Classroom” system is being dismissed by the owners at end of August. Further submission instructions will follow for those who take the exam after end of August.

2 Basic Requirements

The basic requirement is having a personal GitHub account, and be able to use simple git commands.

3 Getting the skeleton project

The skeleton project will be distributed as a “Classroom Link”, that will give you access to a Classroom *Assignment*. You **MUST NOT** create a normal GitHub repository on your own.

4 First access

First, log-in into your GitHub account. Then, use the assignment link provided by the teachers to access GitHub Classroom: you will have to associate your GitHub user to the student’s ID. This action needs to be done only the first time you use classroom. Next time it will be remembered. Please be careful in selecting the correct identity. If you cannot find your identity or associated the wrong one, **DO NOT** DO anything else and promptly contact the teachers.

DO NOT CLICK on “Skip to the next step”, otherwise your assignment will be created as an anonymous submission, not linked to any student in the course, and being anonymous it **WILL NOT** BE EVALUATED.

If you did, contact the teachers to make use your repository is correctly associated with you.

The screenshot shows the GitHub Classroom interface. On the left, a sidebar titled 'GitHub Classroom by GitHub would like permission to:' lists permissions: 'Verify your GitHub identity (enricomasala)', 'Know which resources you can access', and 'Act on your behalf' (with a 'Learn more' link). Below these are 'Resources on your account' including 'Email addresses (read)' and 'Plan (read)'. At the bottom of the sidebar are 'Cancel' and 'Authorize GitHub Classroom' buttons, with a note: 'Authorizing will redirect to https://classroom.github.com'. The main content area is titled 'Join the classroom: politico-WA-2024-exams'. It instructs the user to 'select yourself from the list below to associate your GitHub account with your school's identifier (i.e., your name, ID, or email)'. Below this is a table of 'Identifiers' with three entries, each with a right-pointing arrow. A link 'Can't find your name? Skip to the next step →' is present, with a red 'X' over it and an arrow pointing to it from a red text box on the right. The red text box contains the warning: 'NEVER USE IT! (If used, contact the teacher for a solution)'.

Identifiers

enricomasala	>
enricomasala	>

1. Authorize the Classroom platform to access some of your GitHub user information.	2. Associate your account with your student identity, by selecting your name from the full list of students . If your name is not on the list: DO NOT SKIP , please contact the teachers.
---	---

5 Accepting the assignment

For every new exam, you must “accept the assignment” to get a copy of the skeleton repository. The link to accept the assignment will be provided by the teachers when the assignment is published.

 polito-WA-2024-exams Accept the assignment — practice assignment Once you accept this assignment, you will be granted access to the <code>practice-assignment-enricomasala</code> repository in the polito-WA-2024-exams organization on GitHub. Accept this assignment	 polito-WA-2024-exams Accept the assignment — practice assignment Once you accept this assignment, you will be granted access to the <code>practice-assignment-enricomasala</code> repository in the polito-WA-2024-exams organization on GitHub. Accept this assignment
1. Accept the proposed assignment (using the link specific for the exam).	2. Classroom will create a new private repository and will fork a copy of the skeleton just for you.
 You're ready to go! You accepted the assignment, practice assignment. Your assignment repository has been created: https://github.com/polito-WA-2024-exams/practice-assignment-enricomasala We've configured the repository associated with this assignment (update). Your assignment is due by Jun 23, 2024, 22:05 CEST	 practice-assignment-enricomasala Private forked from polito-WA-2024-exams/exam-template main 1 Branch 0 Tags This branch is 1 commit ahead of polito-WA-2024-exams/exam-template:main. github-classroom[bot] add deadline 9ea2e3e · now 3 Commits - client Initial commit 7 minutes ago - img Initial commit 7 minutes ago - server Initial commit 7 minutes ago - server2 Initial commit 7 minutes ago .gitignore Initial commit 7 minutes ago - README.md add deadline now README
3. After creation, you get a link to the repository in which you MUST work. Verify that the link contains a common part (the exam name), concatenated with your GitHub username . In the example: https://github.com/polito-WA-2026-exams/practice-assignment-enricomasala	4. Now you have your repository and may freely work on it. The repository is private, and only you and the teachers may access it.

6 Developing the project

You may use GitHub as you like, (e.g., use different branches), but remember that the final project must lie in the **main branch** (the content of other branches will not be considered).

7 Submitting the final project

The commit to be evaluated (usually the last commit), **must be tagged with 'final'**. We assume that, if you don't push a commit tagged with **final**, you decided not to take the exam. Also, remember to check that the tag has actually been pushed to the remote repository, for instance by checking its presence from the GitHub web interface. In this example no tags are present.

In case you need to remove the tag for some reasons (e.g., you need to associate it with another commit), please search on the Internet how to remove it. You can add a tag again later with the same name.

No further commits should be made to the repository after the deadline. If you do it, the project will be marked as a late submission and may not be accepted.
